

Smart AI Self-Service Kiosk with Unified Digital Payment, Data Analytics & Artificial Intelligence

The BlueBunny **AI Self Service Kiosk** is the enabler for F&B and retail merchants to transform into “Smart” business operators to keep up with a changing environment and demanding consumers. It is designed to provide a vital boost to help them become more productive, efficient and future-ready. This is achieved through the application of self-service kiosk technology with unified digital payment, data analytics and Artificial Intelligence.

Our BlueBunny **AI Self Service Kiosk** bring relevant and actionable business intelligence to F&B and retail merchants to understand dynamics of their consumers, provide smart recommendations to increase sales, cross-sell and up-sell boosting revenue for their businesses.

Intelligent Kiosk

Key Features

1. **Full Self Service Kiosk with AI**
2. **Unified Digital Payment** - supports Major Payment Schemes
3. **Smart BlueBunny AI Business Advisor**

Key Advantages

1. **AI recommendation to increase revenue** – Smart and relevant recommendation to up/cross sell based on customers’ profile, season and time etc.
2. **Better Quality Product and Service** - Free up staff to focus on more crucial tasks.
3. **Improves customer experience** – Interactive touch-screen where customers can see images of the food and merchandise.
4. **Enhanced order accuracy** - Customers are able to review their orders to ensure correctness cutting down mistakes & omissions.
5. **Convenience of Digital Payment** (SG QR-Code payment supported) – Eliminate cash counting and reconciliation.

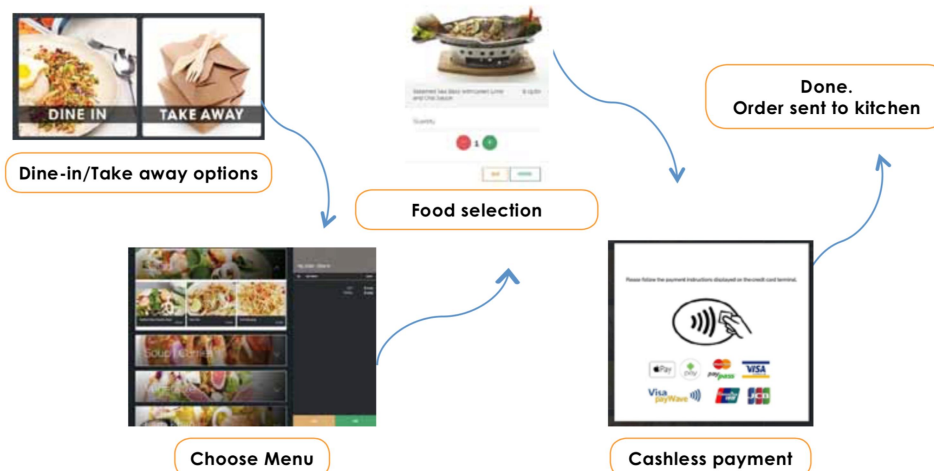

R&D partnerships with leading IHLs in latest data analytics and AI innovations
